Comfort Control at Your Fingertips

# Innovation and the Environment

Over 100 years ago, a humble but determined engineer solved one of mankind's most elusive challenges by controlling the indoor environment. A

leading engineer of his day, Dr. Willis Carrier would file more than 80 patents over the course of his career. His genius would enable incredible advancements in health care, manufacturing processes, food preservation, art and historical conservation, indoor comfort and much more.

Carrier's foresight changed the world forever and paved the way for over a century of once-impossible innovations. Yet in addition to being an accomplished inventor, he was also an avid outdoorsman. Carrier recognized the power and beauty of the natural environment. This appreciation of our world and its resources continues to guide Carrier Corporation today. We will never rest on our accomplishments, but instead consistently look for ways to improve our products, our environment and our world.

Carrier helps you take better control of your comfort with the Comfort™ series three-zone system that gives you enhanced command over comfort and energy management compared to a standard comfort system.

# Leaders in Technology

## Customized Comfort

- 1 The Carrier Comfort™ series three-zone system allows you to divide your home into as many as three separately controlled “comfort zones.”
- 2 A Carrier thermostat in each zone puts comfort control at your fingertips. And, Carrier programmable thermostats offer the ability to create personalized schedules according to how and when you use each area.

## It's About Your Comfort

Most homes have differing comfort needs in different areas. The main living areas are comfortable. The bedrooms are not comfortable, and the basement is largely unoccupied. However, standard comfort systems have just one thermostat with the ability to set one temperature for the entire house. It's like having one light switch to control all of the lighting inside!

Zoning provides customized comfort control, keeping the most commonly used areas of a home comfortable by delivering conditioned air to those areas during the times you select. Zoning can also offer energy saving benefits by cutting back on energy use in areas that are largely unoccupied.

Your Carrier dealer will help you determine the best way to zone your home for the ultimate combination of enhanced comfort, energy efficiency and cost savings.

### Limited Warranty

To the original owner, the Carrier Comfort series three-zone system is covered by a 10-year parts limited warranty upon timely registration. The limited warranty period is five years if not registered within 90 days of installation. Jurisdictions where warranty benefits cannot be conditioned on registration will receive the registered limited warranty periods. See warranty certificate at [carrier.com](http://carrier.com) for complete details and restrictions. Be sure to ask your Carrier dealer about optional labor warranties.

# Carrier® Systems for Unmatched Performance in Every Season

Willis Carrier's meticulous attention to quality and detail led to a major culture shift in the way we live indoors. More than a century later, Carrier Corporation operates with a unique willingness to develop new technology, the confidence to revise proven designs and the ability to deliver results with every new installation.

Part of that equation is our nationwide network of experts you can turn to for all of your indoor comfort needs. Your local Carrier dealer is well equipped to evaluate your home – everything from size, window placement, ductwork, venting and other structural specifics – and create a customized system designed around your lifestyle. So when it's time to make a choice for your family's comfort, make the best decision you'll ever make – Carrier – and let the experts do the rest.

## The Total Indoor Comfort System

**Air Conditioner** provides reliable, high-efficiency cooling for long-lasting comfort and energy savings.

**Gas Furnace** provides reliable, high-efficiency heating for long-lasting comfort and energy savings.

**Evaporator Coil** is matched with the proper outdoor unit to provide top heating and cooling efficiency and years of reliable service.

**Air Cleaner** improves air quality by removing harmful and irritating airborne pollutants in your home.

**Ventilator** combines fresh outdoor air with conditioned indoor air for improved air quality and maximum efficiency – great for today's tightly constructed home.

**Humidifier** replenishes moisture to dry air.

**Zoning** sets different temperatures for up to eight different areas of your home for truly customized comfort and enhanced utility savings.

**UV Lamp** inhibits the growth of contaminants on the indoor coil, leaving your home with cleaner, fresher indoor air.

**Edge® Programmable Thermostat** allows precise temperature and humidity control along with programmable features to further customize your comfort.
